Step 1 - Building the metal bed frame

1.1

Place (A) metal corners in a rectangular shape roughly the size of your mattress.

1.2

Lay (B) and (C) metal rails into (A) metal corners to create the shape of your bed frame. Snap into place.

1.3

Secure (B, C) metal rails to (A) metal corners using (H1) bolts and (H2) nuts. Tighten using (H9) L wrench and (H11) wrench.

Please note: (H2) nuts should be on the inside of the frame.

1.4

Carefully attach (D) corner legs underneath (A) metal corners using (H3) bolts and (H4) washers. Tighten using (H10) L wrench.

Step 2 - Center support system

2.1

Align holes of (E) center support rail with holes on (B) metal side rails. Attach using (H1) bolts and (H2) nut. Tighten using (H9, H11) wrenches.

Please note: (E) center support rail attaches underneath (B) metal side rails.

2.2

Attach (F) center support legs to (E) center support rail using (H5) bolts and (H6) washer. Tighten using (H9) L wrench.

Step 3 - Attaching the upholstered rails

3.1

Loosely attach (G, H) upholstered rails to bed frame using (H7) bolts and (H8) washers.

Please note: if (G) upholstered side rails have an additional hole, make sure the hole faces upwards and away from the (H) upholstered foot rail.

Step 3 - Attaching the upholstered rails

3.2

Push (G) upholstered side rails toward (H) upholstered foot rail to eliminate any gaps. Tighten (G) upholstered side rails first, then (H) upholstered foot rail using flat head screwdriver.

3.3 (Optional)

To reinforce stability of (G, H) upholstered rails, use a phillips screwdriver to attach (H13) L brackets using (H12) screws.

Please note: this requires screwing (H12) directly into the upholstered side rail.

Attaching your headboard

For instructions on how to attach your headboard to your bed frame, please consult the assembly instructions found in the box your headboard was shipped in.

Step 4 - Attaching the slipcover

4.1

Gently drape upholstered slipcover over assembled bed frame. Start with pulling the slipcover over the upholstered headboard (K) followed by the upholstered side (G) and foot (H) rails.

Please note: Adjust slipcover to fit snug before securing velcro adhesives.

4.2

Once slipcover is adjusted and correct, proceed with adhering the inside velcro strips to the inside of both side (G) and foot (H) rails. Fold slipcover flaps to the inside of each rail and align velcro for a firm bond.

Please note: Slipcover length should be just above ground level.
